

Special Issue

Clinical Updates and Future Perspectives on the Chronic Pain Management

Message from the Guest Editors

This issue also highlights future directions, including artificial intelligence-driven pain assessment, wearable technology for real-time monitoring, and the evolving role of regenerative medicine in chronic pain relief. Ethical considerations and health policy perspectives on opioid stewardship and accessibility to advanced pain therapies are also discussed.

By compiling cutting-edge research and expert perspectives, this issue aims to foster innovation and improve clinical practice in chronic pain management, ultimately enhancing patients' quality of life. We hope these contributions will inspire continued research and multidisciplinary collaboration in this critical field.

For this Special Issue on "Clinical Updates and Future Perspectives on the Chronic Pain Management", we are soliciting high-quality original research, systematic reviews, meta-analyses, and expert perspectives that address key advancements and challenges in the field.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
