Developments and Innovations in Head and Neck Surgery

Message from the Guest Editors

Head and neck surgery is a field under continuous development, where advances in technology have enabled a variety of interventions that are minimally invasive with excellent outcomes, including for patients with cancer. Results have improved considerably over the years in light of these developments and due to the greater expertise of the surgeons. We aim to highlight these improvements that have become the standard of care worldwide over the past few years, and to familiarise our younger colleagues with the current options that are available to them. Technological developments are also the foundation for better results in multidisciplinary teams, especially when we discuss oncologic patients. The switch from classic open surgery to minimally invasive procedures is directly proportional with patient compliance and an increased adherence to treatment, thus aiding in an end result of a disease-free status.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
