Recent Advances in Breast Cancer Diagnosis, Treatment, Psychology, Management, and Reconstruction

Message from the Guest Editor

Breast cancer in the United States is the most common cancer in women after skin cancer, regardless of race or ethnicity. The late detection and advanced-stage diagnosis of breast cancer are still current issues in several countries. Lymphedema after lymph-node dissection or radiation therapy occurs in 10%–40% of patients with breast cancer. I invite colleagues from all over the world to contribute to this Special Issue on breast cancer. Radiologists, psychologists and psychiatrists, general surgeons, plastic surgeons, and breast cancer scholars in general are encouraged to submit manuscripts. We will consider submissions in the form of case reports, original research articles, reviews, commentaries, discussions, and letters to the Editor. Now more than ever it is necessary for breast cancer specialists to communicate with each other about the new possible strategies and innovations in the diagnosis, treatment, psychology, management, and reconstruction of breast cancer, with the final goal of fighting this neoplasm that unfortunately still afflicts millions of women and men worldwide.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
