Special Issue

Challenges and Innovations in Breast Cancer Surgery

Message from the Guest Editor

Oncoplastic breast surgery has gained popularity across the world. There is a paradigm shift towards the deescalation of various aspects of breast cancer surgery at present without compromising the oncological outcome. Wider use of perforator chest wall flaps and various mammoplasty techniques has helped to expand the scope of breast conservation surgery. Newer localisation techniques for clinically non-palpable cancers have significantly helped surgeons to use theatre time more efficiently with a better patient experience. Likewise, the availability of better implants and acellular dermal matrices and other meshes has been instrumental in widening the reconstructive options available to our patients. The future of breast surgery is exciting with ongoing innovations in various fields such as resection margin assessment methods and with the wider application of artificial intelligence in various aspects of breast cancer management. Given the relevance of this topic, Medicina is launching a Special Issue titled "Challenges and Innovations in Breast Cancer Surgery". I would be delighted if you could be part of this exciting project, by submitting your work.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius

Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
