# Advances in the Prevention and Treatment of Mycobacterial Diseases

## Message from the Guest Editor

Mycobacterial diseases, including tuberculosis (TB) and infections caused by non-tuberculous mycobacteria (NTM), represent a persistent global health challenge. While TB remains a leading cause of infectious mortality, NTM infections are increasingly prevalent, particularly among immunocompromised individuals and those with chronic pulmonary conditions. The immunological complexity of these diseases, coupled with diagnostic and therapeutic limitations, underscores the urgent need for deeper scientific inquiry. Recent advances in molecular diagnostics, imaging, and host-directed therapies have begun to reshape the clinical landscape. Studies on granuloma biology, fibrosis, and immune gene polymorphisms (e.g., TLRs, ADAM17) have provided new insights into host-pathogen interactions. However, the emergence of multidrug-resistant strains, biofilm formation, and limited vaccine efficacy continue to hinder progress.

We invite original research, reviews, and perspectives that explore immune mechanisms, host-pathogen dynamics, novel therapeutics, and translational approaches.

# **About the Journal**

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

## **Editor-in-Chief**

Prof. Dr. Edgaras Stankevičius

Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

### **Author Benefits**

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

### **Journal Rank:**

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
