Updates on the Management of Abdominal Surgery Complications

Message from the Guest Editors

Over the past 30 years, abdominal surgery has experienced a significant transition from open methods to minimally invasive techniques. The vast majority of abdominal pathologies of surgical interest can be approached with laparoscopic or robotic techniques. The majority of surgical operations are performed with these techniques. Even the approach to surgical complications after abdominal surgery is increasingly characterized by the use of minimally invasive, endoscopic, and interventional radiology techniques. These techniques have a minor impact on the patient's physiology. The scope of this Special Issue encompasses the different management pathways for the treatment of complications after abdominal surgery that have currently been implemented in the laparoscopic era. This volume will examine the techniques, technologies, and results of cutting-edge clinical, diagnostic, and therapeutic processes in the field of complication management after abdominal surgery. Editors invite contributions from recognized members of the surgical scientific community, such as editorials, systematic reviews with or without meta-analysis, and observational or interventional original studies.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
