Advances in Cancer Therapy from Research to Clinical Practice—Surgical, Molecular or Systemic Management of Cancer

Message from the Guest Editors

Cancer remains one of the most challenging diseases from epidemiologic, clinical and therapeutic perspectives. The rhythm of changes in various aspects of the oncological disease, the molecular characterization of new subtypes of classical primary-type tumors, new pathways in cancerogenesis and new classes of therapeutical agents makes it very difficult to follow all relevant findings in this research field. Most significantly, what remains are the personal clinical observations and experiences of each of us. We all know very well of the level of trust required in these things, but we remain doctors who treat real-life patients, not those selected for a clinical trial. We invite you to participate in this Special Issue of *Medicina*, in order to facilitate the presentation of your research or institutional experience of treating cancer patients. Your clinical experience and research ideas represent a very precious tool for each of every one of us.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
