

## Special Issue

# Cardiovascular Disease: Management, Treatment Recommendations, and Future Research

### Message from the Guest Editor

Advances in diagnosis and treatment of cardiovascular disease in recent decades have been stunning. New ideas on diagnosis, including new imaging modalities, possibilities of genetic and molecular diagnosis, and new markers and tools for prognosis and individualized therapy have been developed and successfully implemented in medical practice. We take part in this success story through the immediate revascularization in heart and brain infarction for the best preservation of organ function, through advances in cardiac surgery, electrotherapy, and new drugs developed successfully for supporting the diseased or failing heart, and last but not least, with new methods of mechanical cardiac support and multiorgan transplantation for the most advanced forms of heart failure. In view of new challenges for cardiovascular medicine during and after the COVID-19 epidemic, wider use of telemedicine tools for diagnosis, rehabilitation, and communication is mandatory. It is my privilege to cordially invite researchers and practitioners to share their experience and expertise and submit new ideas and recent hot results to this unique Special Issue.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
