The Role of the Complement System in Chronic Inflammation

Message from the Guest Editor

Chronic inflammation has moved into the limelight of public opinion when concern is expressed about the quality of life. Often unseen, the socioeconomic burden is substantial and a feature of modern, developed societies, where long life expectancy has become the new norm. This issue will study the role complement has been characterised to play in a diverse range of chronic inflammatory conditions. Complement was originally described as a plasma protein system involved in innate immune defence but has in recent years advanced to a modulator of mechanisms important in disease pathogenesis and a fine-tuner of cell activities. These new advances in understanding will be evidenced in original work and review submissions to this Special Issue.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
