Special Issue

Clinical Advances in Cardiopulmonary Bypass Surgery: Innovations and Impacts on Patient Outcomes

Message from the Guest Editors

The cardiopulmonary bypass has revolutionized cardiac surgery for decades, allowing for complex procedures to be performed. However, the field has witnessed significant advancements in recent years, driven by technological innovations, an improved understanding of physiological processes, and the pursuit of better patient outcomes. This Special Issue aims to explore cutting-edge advancements in cardiopulmonary bypass, focusing on how recent innovations have improved clinical outcomes and the quality of care in cardiac surgery. We invite contributions on topics such as innovative or minimally invasive CPB techniques, patient monitoring systems, hemodynamic optimization, and novel approaches to managing complications and postoperative care. We encourage reseachers to submit their original research, comprehensive reviews, clinical studies, and case reports that offer practical solutions or novel insights into cardiopulmonary bypass.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius

Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
