

## Special Issue

# Early Diagnosis and Treatment of Cardiovascular Disease: 2nd Edition

### Message from the Guest Editors

This Special Issue addresses the continuous development and research of cardiovascular diseases and comorbidities that influence prognosis and treatment, aiming to provide a significant perspective upon early diagnosis and treatment in different conditions. New guidelines on heart failure draw attention to the significant impact of early complete treatment and early diagnosis on cardiac disease. Patients with diabetes mellitus, chronic kidney disease, and anemia must be checked for cardiac conditions, and diagnosis and active treatment should address all risk factors. New data also show the utmost importance of inflammation in cardiac diseases. Moreover, novel biomarkers have emerged to improve diagnosis accuracy. In recent years, evidence has increased regarding the diagnosis and involvement of comorbidities in cardiac function. Furthermore, the recent COVID-19 pandemic showed the importance of thorough follow-up of all data known to influence treatment and prognosis and, of course, the cardiac structures themselves. This Special Issue aims to offer a complex and current overview of new research related to cardiac disease.

### Guest Editors

Dr. Mihaela-Viviana Ivan

Department of Internal Medicine II, Faculty of Medicine, "Victor Babes" University of Medicine and Pharmacy, Eftimie Murgu Square No. 2, 300041 Timisoara, Romania

Prof. Dr. Elena Bobescu

1. Faculty of Medicine, Transilvania University of Brasov, Brasov, Romania
2. County Emergency Hospital of Brasov, Brasov, Romania

### Deadline for manuscript submissions

31 July 2026
