Special Issue

Contemporary Trends in Urothelial Cancer Management

Message from the Guest Editors

In the past few years, great progress has been made in urothelial carcinoma diagnosis and treatment options, a disease which is diagnosed in more than half a million people every year. With the advancements in robotic surgery for the treatment of muscle-invasive bladder cancer and upper-tract urothelial carcinoma, there has been a significant decrease in patient morbidity and mortality, with improvements in the quality of life. Furthermore, novel trials have incorporated immunotherapy with immune checkpoint inhibitors in high-risk and high-grade non-muscle-invasive urothelial carcinoma, while, in metastatic disease, targeted treatments and understanding the genomic landscape have increased the options available in an oncologist's armamentarium. This Special Issue aims to present and evaluate new progress in urothelial carcinoma diagnosis and treatment. Articles associated but not limited to the following topics are welcome: new modalities in the diagnosis of bladder cancer and upper-tract urothelial carcinoma and novel treatment options for localized and metastatic urothelial carcinoma.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius

Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
