

## Special Issue

# Early Diagnosis and Management of Glioma

### Message from the Guest Editors

The early diagnosis of the disease is based on rapid radiological findings, which allows us to advance the first diagnostic hypothesis and on which the indication for surgical treatment will then be advanced. Early diagnosis and surgical treatment play a fundamental role because they allow an early histological and biomolecular diagnosis, as well as rapid treatment of the tumor in its progress, which can therefore benefit from surgical removal as maximally as possible. This also allows the patient to be directed towards an oncological and radiotherapy path with a clinical status that can allow them to face the subsequent necessary therapies. In this scenario, the role of new diagnostic and therapeutic technologies is therefore fundamental, which can allow early treatment of gliomas at onset, consequently guaranteeing the most favorable prognosis possible. In this Special Issue, we hope to be able to receive valuable scientific contributions that can confirm and implement this concept and that provide the basis for subsequent studies that have a concrete impact on daily clinical practice, which can guarantee a better prognosis for this type of patient.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
