

Special Issue

Current and Future Directions in Gastric Surgery

Message from the Guest Editors

The treatment of gastric cancer has been changing during the last 10 years. The multimodal approach is offering innovative treatment options with improved prognosis also in Stage IV patients. On the other hand, technological advances are promoting the diffusion of minimally invasive treatments, exploiting robotics, augmented reality, and artificial intelligence. This Special Issue aims to explore the latest updates in the management of gastric cancer, focusing on the multimodal, molecular-based, and surgical treatment of these patients.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
