Clinical Management of Spinal Diseases and Traumatology

Message from the Guest Editor

The treatment of spinal disorders, including traumatic injuries, involves several phases, ranging from conservative therapies such as exercise, medication, injections, and corsets to surgery and post-operative rehabilitation. The progress has been remarkable, and new treatment methods have emerged in the past few years that have replaced standard treatments. Therefore, it is imperative to pay attention to the latest information and keep abreast of developments. In this Special Issue, we would like to invite a wide range of essential articles on treatments for which evidence has been obtained in the management of spinal diseases and trauma, as well as on new treatments for which evidence will be established in the future. This Special Issue will be useful in clinical practice for both specialists for spine and primary care physicians.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
