Recent Advances in Cervical and Vulvar Cancer

Message from the Guest Editors

Gynaeco-oncology is a dynamic field. As gynaecologic malignancies are varied and include some of the most common cancers, vaccination and early treatment may prevent and cure many HPV-mediated cancers. More conventional “pillars” of treatment include surgery, radiation, and chemotherapy, depending on a neoplasm’s stage and severity. Nevertheless, we emphasise the importance of considering new tailored approaches, such as the use of aptamers in gynaecological cancers, microbiota in therapeutic modulation, perineurial invasion, PDL-1 expression, and ground-breaking imaging methods that allow for precise staging. Progress from this perspective indicates the importance of a high response rate and the wider implementation of conservative surgical treatment, allowing for the early identification of oncological disease. Today, the scientific community enjoys a vast wealth of evidence that has led to improvement in clinical practice. As such, this Special Issue seeks to collect new scientific evidence in the field of cervical and vulvar cancers. Thus, researchers are welcome to submit case reports, original publications, reviews, and meta-analyses.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
