New Advances in Female Pelvic Floor Dysfunctions Management: 2nd Edition

Message from the Guest Editor

Female pelvic floor dysfunctions (PFDs) are common conditions that affect over 20% of the adult population. These disorders, which include urinary incontinence, anal incontinence, pelvic organ prolapse, and sexual dysfunction, represent serious health problems for the female population. As women continue to live longer lives, understanding how to promote dialogues between clinicians and patients around these issues and finding therapies to reduce its effect on women's quality of life should be a priority for future research. Moreover, it is important to develop the concept of a multidisciplinary approach to PFDs, which, in recent years, has led to the improvement of the condition for women. In this Special Issue, we would like to provide a collection of papers, original articles, or clinical/systematic reviews aimed at providing a comprehensive overview of the recent advances in the diagnosis and treatment of PFDs. This Special Issue is the continuation of the Special Issue "New Advances in Female Pelvic Floor Dysfunctions Management"

(https://www.mdpi.com/journal/medicina/special_issues/Female_Pelvic_Floor_Dysfunctions).

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
