Update on the Use of Ultrasound in Gynecology

Message from the Guest Editor

Ultrasonography is the most critical imaging technique used in modern gynecology. It allows for the diagnosis of gynecological conditions and enables medical professionals to plan the best medical or surgical treatment. Over the last ten years, several improvements have been made in the assessment of benign gynecological pathologies (such as endometriosis and uterine fibroids) and gynecological cancers (such as ovarian, endometrial, and cervical cancers). Furthermore, three-dimensional or four-dimensional ultrasonography can improve diagnostic performance by reproducing the anatomy precisely. This Special Issue aims to present the recent advances in the use of ultrasounds in gynecology. Submissions consisting of clinical papers, systematic/narrative reviews, and technical notes are welcome. The main topics of interest for the Special Issue include (but are not limited to) endometriosis, uterine fibroids, endometrial pathologies, ovarian cancer, endometrial cancer, and cervical cancer. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
