Management and Advances in Breast Cancer Therapy

Message from the Guest Editors

The earliest records of breast cancer date back to ancient Egypt 3000–2500 years b.c. To date, it is the second most common malignancy overall and by far the most common malignancy among women worldwide. Breast-conserving procedures with subsequent radiotherapy and various forms of mastectomy with or without radio-chemotherapy are available treatment options for breast cancer patients. The size and localization of the tumor, definite classification of the breast cancer entity, size of the breast and the patient's wishes play important roles in the decision-making process. This Special Issue intends to include the full range of breast cancer therapy, covering a wide range of topics incorporating basic research and clinical studies. It offers a platform to share ideas and new advances regarding surgical breast cancer treatment, pharmaceutical therapies, radiotherapy and breast reconstruction. Additionally, we encourage authors to present epidemiologic and quality of life studies to obtain a comprehensive coverage of the management of breast cancer.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
