Updates on Risk Factors and Prevention of Coronary Artery Disease

Message from the Guest Editors

Despite all our accumulated knowledge, ischemic coronary disease continues to represent one of the most widespread pathologies, with a very high mortality and morbidity. Acquiring detailed knowledge of risk factors and their control is crucial both in the management of this disease and in placing patients in risk groups in order to prevent the occurrence of this pathology or its complications. Thus, to expand on the enormous progress made in diagnosis and therapy in coronary artery disease, it is extremely important that we develop preventive measures and strategies to control this major health problem. Our main objectives for this Special Issue are to update the knowledge related to the control of risk factors and to discuss the most effective prevention strategies, as well as modern treatment methods, in this very challenging pathology, emphasizing the clinical impacts on patient outcomes. I welcome original research, reviews, and other types of articles that contribute to our understanding and the advancement of knowledge in the field of coronary artery disease, focusing on the issues listed above.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
