Innovative Technologies and Risk Factors in Joint Surgery

Message from the Guest Editors

Joint surgery has undergone remarkable transformations over the past few decades. These developments have led to the widespread adoption of minimally invasive techniques and robotic-assisted surgery, all aimed at improving accuracy, reducing complications, and enhancing functional recovery. Alongside these innovations, growing attention has been paid to the identification and management of risk factors that can significantly influence surgical outcomes.

The goal of this Special Issue, entitled “Innovative Technologies and Risk Factors in Joint Surgery”, is to offer an up-to-date and comprehensive overview of current challenges and advances in the field. By bridging clinical insights and technological innovations, we aim to explore how emerging tools and strategies are reshaping orthopaedic and trauma care.

We are seeking cutting-edge contributions in the form of original research articles, clinical trials, and systematic reviews. Submissions may address all joints—including the hip, knee, shoulder, ankle, and smaller articulations—and should focus on topics such as new surgical techniques, perioperative risk assessment models, and methods to optimize postoperative outcomes.

Guest Editors

Prof. Dr. Cesare Faldini

Prof. Antonio Mazzotti

Dr. Elena Artioli

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
