

## Special Issue

# State-of-the-Art of Neurogenic Bladder Disease

### Message from the Guest Editors

Neurogenic bladder disease denotes dysfunction of the lower urinary tract caused by a neurologic disorder.

Etiology varies from severe (spinal cord injury, sclerosis multiplex, etc.), to idiopathic impairment, it represents a complex of causes that require different (often individual) approaches and treatments. It poses a significant socioeconomic burden for healthcare and dramatically lowers patients' quality of life. Due to its complex nature, diagnosis, treatment, and research require multi-disciplinary involvement. In recent years, significant progress has been made in the treatment and research of this disease, and some experimental treatments hold promise for the near future. The purpose of this Special Issue is to encourage researchers to share their latest research and to summarize the recent advances in clinical and pathologic aspects of neurogenic bladder disease. We invite authors to submit original articles and review articles focusing on pertinent topics and new advances in neurogenic bladder disease.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
