Special Issue

Liver Surgery: Current Treatment and Future Options

Message from the Guest Editor

Liver surgery includes hepatic resection and liver transplantation. Common indications for hepatic resection are hepatocellular carcinoma, liver metastasis from colon cancer, and bile duct origin intrahepatic tumors. Liver transplantation is the only curative treatment option for end-stage liver disease, and it is also an alternative treatment option for hepatocellular carcinoma. There have been many studies on novel challenges and advances in liver surgery, but the field still needs continuous effort and research. The aim of this Special Issue is to introduce and discuss the current treatment and future options in liver surgery, including hepatic resection and liver transplantation. It includes the study of preoperative diagnosis, perioperative management, surgical techniques and innovations, and prognosis after surgery. We invite colleagues around the world to share their experience and knowledge on novel challenges and advances in liver disease with original studies, reviews, or communications in order to develop this important field.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius

Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
