Advances in Chronic Coronary Syndrome and Coronary Heart Disease

Message from the Guest Editors

Given the high number of ischemic heart disease cases and the growing incidence worldwide, it is important to be kept up to date with the newest recommendations regarding both diagnosis and treatment. Apart from acute management, which is life-saving, it is important to acknowledge the long-term impact an ischemic cardiac event has on heart function and how the predisposition to a reoccurrence is increased. Periodic long-term supervision, together with a closely adhered and monitored treatment schedule, are paramount principles of patient management. Additionally, patients are included in exercise-based cardiovascular rehabilitation programs, which have been shown to significantly reduce cardiac-related mortality and improve the quality of life of patients. These are being recommended by the newest guidelines as a required step to be undertaken. The aim of this Special Issue is to gather the newest data and studies on the management of patients with chronic coronary syndromes. Therefore, we encourage to submit your articles on this topic.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
