Recent Breakthroughs in the Diagnosis and Treatment of Oral Inflammatory Diseases

Message from the Guest Editors

Oral inflammatory diseases with different aetiopathogenetic mechanisms can occur as a primary disease, as a consequence of systemic diseases, or iatrogenically (e.g., oncological therapy). A detailed medical and dental history and a clinical oral examination are the basis for correct and timely diagnosis and treatment. The treatment of patients with oral inflammatory diseases should be multidisciplinary (involving specialists in dermatoveneology, immunology, gastroenterology, and oncology). The evidence-based connection between oral and general health is well known. The connection between physical and mental health in the treatment of oral inflammatory diseases should not be neglected either. The aim of this Special Issue of *Medicina* is to present the latest findings and achievements in the diagnosis and treatment of oral inflammatory diseases, including the aetiopathogenetic mechanism, clinical picture, diagnosis, treatment, and clinical outcomes. In addition, contributing articles relate to all multidisciplinary fields (medicine and dentistry) in which the oral cavity is affected by inflammation.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
