From the Perspective of Traditional Chinese Medicine: Clinical Presentations and Treatment of Depression

Message from the Guest Editors

Depression is a mental health disorder, which varies from mild to severe changes in mood and affects physical, mental, and behavioral health. Depressive disorders may represent an interactive matrix of reciprocally interactive pathophysiology influenced by various factors. The sustained stress on individuals with genetic susceptibility leads to deficits of the HPA axis, imbalanced monoamine/cytokine, decreased neurogenesis, and altered dynamics of connectivity in the reward and motivational circuitry. These mechanisms reduce neuroplasticity and impair the functional integrity of regulation neurocircuitry. In this context, the drugs that regulate neurotransmitters, including selective serotonin reuptake inhibitors, serotonin, and norepinephrine reuptake inhibitors, and tricyclic and monoamine oxidase inhibitors, are the most commonly prescribed antidepressants. However, these antidepressants only have relative success and can result in several side effects, particularly in chronic use. We invite colleagues around the world to contribute manuscripts with in vitro, in vivo and clinical studies.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
