Special Issue

The Laparoscopy in Abdominal Surgery

Message from the Guest Editors

Laparoscopic surgery has widely extended its applications with the development of different materials, miniaturized instruments, and robotic-assisted surgery and has been adopted in several countries as the golden standard for abdominal surgery. Robotics may offer technological and ergonomic benefits that overcome the limitations associated with conventional laparoscopy. In addition, the development of laparoscopic procedures TAPP (transabdominal preperitoneal) and TEP (totally extraperitoneal). laparoscopic hysterectomy, colectomy, appendectomy, and cholecystectomy have allowed us to offer the advantages of a minimally invasive approach, such as laparoscopy, to our patients. In this Special Issue, we would like to move this field forward by inviting original clinical and basic research articles, meta-analyses, and systematic reviews focused on new advances in laparoscopic abdominal surgery.

The purpose of this Special Issue is to address recent developments in laparoscopic surgical procedures and new technological advances in abdominal surgery. We look forward to receiving your submissions and to advancing the field of laparoscopic surgery.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius

Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
