Pathophysiology and Treatment of Spinal Cord Injury

Message from the Guest Editor

Spinal cord injury (SCI) is a devastating event leading to paresis, sensory, autonomic, respiratory, and bowel disturbance that is permanent. There is no established treatment except for surgical procedures to restabilize the spine and decompress the spinal cord in the case of traumatic SCI. Whereas rehabilitative therapies are implemented after the acute treatments, the injured spinal cord exhibits only a small degree of plasticity and functional recovery.

The development of a new treatment is important, particularly to target its acute phase to influence the consequences thereafter. Researchers are discovering several points of action to suppress secondary damage in acute SCI, modify the microenvironment, and induce more plasticity toward functional recovery. This Special Issue focuses on newly developing fundamental treatments, including rehabilitative interventions and preventive measures.

We are waiting for papers from the field of Neurology and Neurosurgery, Orthopaedic surgery, Urology, and Physical and Rehabilitation Medicine.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
