Evolution in Treatment and Diagnosis of Spine Disorders

Message from the Guest Editor

In recent years, we have been observing great evolution in the treatment of spine disorders. In addition, diagnostic tools and methods for spinal disorders have been essentially improved. The main aim of this Special Issue of *Medicina* is to deliver evolution in the treatment and diagnosis of spine disorders. This Special Issue is open to studies for surgical strategies, diagnoses, clinical outcomes, etiology, and systematic reviews, etc. We invite authors to submit articles related to all the area of spinal disorders. The types of paper can be either of original articles, review articles, technical notes, and case reports.
