Recent Advances in Interventional Cardiology

Message from the Guest Editors

This Special Issue, titled “Recent Advances in Interventional Cardiology,” brings together cutting-edge research focusing on contemporary advances and future directions in percutaneous coronary intervention (PCI). The main topics of interest include, but are not limited to, advances in drug-coated balloons, new strategies for tackling calcific lesions, new approaches to complex bifurcation lesions, and current strategies regarding antithrombotic therapy and high-bleeding-risk patients.

We invite the submission of original research articles, systematic reviews, meta-analyses, clinical studies, technical innovations, and expert perspectives.
