

Special Issue

Hip and Fragility Fracture Management

Message from the Guest Editor

The purpose of this Special Issue is to discuss the evidence for the fixation/prosthetic treatment of femoral neck fractures, as well as trochanteric and subtrochanteric fractures in elderly patients. The scope of the Issue is deliberately broad in order to encourage the coverage of a wide range of topics and perspectives related to the management of hip fractures. This includes not only clinical treatments but also biomechanical considerations regarding implant anchorage, patient experience, epidemiology, service delivery, health promotion, complex co-management strategies in geriatric fracture care including fall prevention, and new interdisciplinary developments like the installation of a fracture liaison service or a geriatric fracture center.

Guest Editor

Prof. Dr. Matthias Knobe

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
