

Special Issue

Current Management of Hip Fracture

Message from the Guest Editor

The purpose of this Special Issue is to discuss the evidence of the current management of hip fractures. Therefore, the scope is not tailored to only surgical strategies and the choice of implant, but should also focus on the whole process of treating patients after suffering a hip fracture. This includes epidemiology, process optimization, orthogeriatric co-management concepts, geriatric fracture centers, and secondary prevention of fractures. Even the analyses of the socioeconomic consequences are of interest. Moreover, the type of fracture is not limited to femoral neck fractures, but also included trochanteric and subtrochanteric femur fractures, proximal periprosthetic and periimplant fractures, and acetabular fractures.

Guest Editor

Prof. Dr. Carsten Schoeneberg

Department of Orthopedic and Emergency Surgery, Alfried Krupp Hospital, Essen, Germany

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
