Colorectal Surgery: Clinical Advances and Challenges

Message from the Guest Editors

Colorectal surgery is well established as the main treatment for colon cancer; however, some topics related to surgical strategy and its integration with other methods are still hotly debated. The scope of this Special Issue is to gather and present innovative data regarding the following topics:

- recommendations for the use of complete mesocolic excision (CME);
- integrated therapeutic strategies (cytoreductive surgery plus HIPEC, EPIC, PIPAC...) that are used to improve the outcomes of OS and DFS in advanced diseases;
- the latest operative tools used to optimize surgical resection and reduce the risk of iatrogenic injury, including but not limited to the use of targeted tumour tracking and intraoperative fluorescent imaging with indocyanine green.

We welcome original articles on pre-clinical and clinical research, as well as systematic reviews, cohort studies, and case reports adhering to the aforementioned theme of surgical management of colorectal cancer.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
