Recent Advances in Dental Implants and Oral Health

Message from the Guest Editor

Scientific advances are very important for the health professions. New technologies in implantology and oral health, for example, can make appointments faster and more comfortable for both dentists and patients, in addition to ensuring better results. This present Special Issue, on recent advances in dental implants and oral health, is an opportunity for researchers of different materials and techniques, their academic staff, and clinicians to present their latest findings. Implantology today shows remarkable potential to develop new materials and techniques, opening interesting perspectives for clinical applications. The large and growing link between materials science and the clinical applicability of state-of-the-art materials allows professionals to implement new treatment modalities to benefit patients, bringing a new and very interesting cost–benefit ratio. It is a pleasure to invite you to submit a manuscript to this Special Issue, such as full articles, reviews, and communications in any area of implantology.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
