## Advances in Liver Surgery

### Message from the Guest Editor

Liver cancers including hepatocellular carcinoma (HCC) are one of leading causes of cancer-related deaths worldwide. Liver transplantation is generally considered the most curative treatment, but it is limited by the imbalance between the numbers of recipients and available donors. Recently, laparoscopic liver resection has been developed and widely accepted for standard care of treatment for liver tumor. We are pleased to invite you to contribute to this Special Issue titled “Advances in Liver Surgery”. This Special Issue aims to showcase standards for the treatment of liver cancer and investigate evidence, technical improvement, and expert’s perspectives on the treatment of liver cancer. In this Special Issue, original research articles and reviews are welcome. I look forward to receiving your contributions.
