

Special Issue

Infections and Infectious Diseases: Epidemiology, Mechanisms of Infection and Treatment Options

Message from the Guest Editor

Infectious diseases occupy a priority place in contemporary medicine through the ability to prevent and treat diseases caused by various pathogens: bacteria, viruses, fungi, parasites. Although considerable progress has been made in recent decades in the field of etiopathogenesis, diagnosis, and treatment of infections, statistics show that infectious diseases are the second leading cause of death worldwide and the leading cause of death in children under 5 years of age. We set out to conduct a Special Issue of *Medicina* that would include "Infections and Infectious Diseases: Epidemiology, Mechanisms of Infection and Treatment Options". For this, we invite all specialists from infectious disease clinics, epidemiologists, microbiologists, laboratory doctors, internists, biologists, and researchers passionate about infectious pathology and its challenges to send completed work to be published in this special topic of the journal *Medicina*.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
