

Special Issue

Advances in Interdisciplinary Research in Medicine and Dentistry

Message from the Guest Editors

Background and history of this topic: The current era belongs to the interdisciplinarity approach. Medicine has been divided into many subspecialties, and so a comprehensive research approach is highly needed. There is a strong relationship between oral and general status. At the same time, during the last decade alone, there have been many publications emphasizing the importance of oral health in general health. *Aim and scope of the Special Issue:* This Special Issue aims to gather papers that combine successful elements of fundamental, experimental, therapeutical or clinical research, both in medicine and dentistry; also of interest are papers that address the innovative application of statistical methodologies to find answers to problems in various medical or biomedical specialties. *Cutting-edge research:* Finite element method (FEM), molecular biology, salivary research, systemic diseases and their oral impact, periodontal treatment and the modulation of the systemic status, cytokines, MMPs, oral health versus general health. *What kind of papers we are soliciting:* Reviews, systematic reviews, meta-analysis, case reports and original papers are all welcomed.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
