Bariatric Surgery: New Techniques and Patient Outcomes

Message from the Guest Editors

As bariatric and metabolic surgery continues to evolve, procedures and minimally invasive strategies are transforming the management of obesity and its related comorbidities. This Special Issue focuses on techniques in the treatment of obesity, encompassing both surgical and endoscopic approaches. The aim is to explore how advances in technology, surgical instrumentation and procedural refinement are improving safety, efficacy and patient outcomes. Moreover, the expanding field of endoscopic bariatric and metabolic therapies represents an exciting frontier, offering less invasive alternatives for patients who may not be suitable candidates for traditional surgery. These interventions, including endoscopic sleeve gastropasty and intragastric balloon placement, have shown promising results in weight loss and metabolic improvement. We welcome original research articles and technical reports addressing innovations in technique, patient selection criteria, and long-term outcomes. By bringing together perspectives from clinical practice and research, this Special Issue provides a comprehensive overview of current trends and future directions in the interventional treatment of obesity.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
