Recent Advances and Future Challenges in Interventional Cardiology

Message from the Guest Editors

Over the past decades, interventional procedures have become fundamental in the diagnosis and treatment of many cardiovascular diseases. The benefits of minimal invasiveness and reduced complications make intervention the therapy of choice in many cases.

Interventional cardiology is a rapidly growing field, and the development of newer devices and the improvements in endovascular techniques are substantially improving the outcomes of the procedures available and expanding the use of this approach. The aim of this Special Issue is to publish the latest evidence and broadcast the status of knowledge regarding novel endovascular techniques, complications management, cutting-edge technologies, and understudied populations that can help to guide medical practice. We welcome authors to submit original research manuscripts, meta-analyses, reviews, and case reports focusing on the recent advances and challenges in cardiovascular interventions. Topics include, but are not limited to, coronary artery disease, valvular pathology (transcatheter aortic valve replacement, transcatheter mitral valve repair) or peripheral endovascular procedures (peripheral artery disease, renal denervation).

Guest Editors

Dr. Leslie Marisol Lugo Gavidia
Dr. José Antonio Linares-Vicente
Dr. Warren David Raymond

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
