

# Special Issue

## Advances in Knee Surgery

### Message from the Guest Editors

In the orthopaedic surgical field, knee surgeries have made great progress over the last decade including ligament, meniscus, and cartilage surgeries, osteotomy, and arthroplasty. The main aim of this Special Issue of *Medicina* is to showcase new advances in knee surgeries for various patients suffering from knee injuries and diseases. This Special Issue is open to studies for new surgical techniques, surgical strategies and decision making, clinical outcomes, and systematic reviews and meta-analyses. Authors can submit their technical notes, surgical strategies and decision making, clinical outcome studies, comparative studies, and systematic reviews and meta-analyses for new surgical techniques.
