

## Special Issue

# Prosthodontics and Restorative Dentistry: New Insights and Future Directions

### Message from the Guest Editors

Prosthodontics and restorative dentistry have undergone remarkable advances in recent decades, driven by digital technologies, novel biomaterials, and a growing focus on personalized and minimally invasive treatments. These developments have transformed clinical protocols, enhanced patient outcomes, and opened new opportunities for interdisciplinary dentistry. The integration of CAD/CAM systems, digital workflows, 3D printing, and artificial intelligence is reshaping diagnostic and treatment planning strategies, while innovations in materials and adhesive techniques are expanding the range of durable and esthetic restorative options. The goal of this Special Issue is to gather original research and systematic reviews that address the latest scientific and clinical insights in prosthodontics and restorative dentistry. Contributions are encouraged on topics such as digital and AI-assisted workflows, innovative techniques, long-term clinical outcomes, patient-reported measures, and future perspectives that will define the evolution of the field.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
