

Special Issue

Cardiovascular Events and Epidemiology

Message from the Guest Editors

This Special Issue seeks to gather research that delves into the patterns, causes, and effects of cardiovascular events on populations worldwide. The goal is to offer a platform for the dissemination of papers that improve our understanding of CVD epidemiology, with an emphasis on identifying at-risk populations, novel biomarkers, and emerging trends in disease occurrence. We aim to feature innovative research on several topics, including the following: the role of novel biomarkers and genetic factors in predicting cardiovascular risk, AI-driven approaches in predicting cardiovascular events and studies examining the residual cardiovascular risk, associated with inflammation, obesity and lipid parameters. We invite the submission of high-quality research papers in the following formats:

Original research articles that provide new data on CVD epidemiology and prevention.

Review articles that synthesize the existing literature on trends in cardiovascular events.

Meta-analyses that aggregate data on key epidemiological findings.

Guest Editors

Dr. Alexios S. Antonopoulos

1st Cardiology Department, Hippokration General Hospital of Athens, National and Kapodistrian University of Athens, Athens, Greece

Dr. Spyridon Simantiris

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
