

Special Issue

Diagnosis and Treatment of Gynecological Diseases: 2nd Edition

Message from the Guest Editors

Gynecological diseases, both benign and malignant, represent one of the leading causes of female morbidity and mortality worldwide. The diagnosis and treatment of gynecological diseases constitute an ever-evolving topic shaped by changes in technology and scientific developments. The aim of this Special Issue is to present the latest evidence and knowledge in this field of research with respect to the development of new diagnostic tools, advances in gynecological imaging techniques, novel procedures, operative techniques, and materials, anatomical considerations, pre- and/or postoperative management, enhanced recovery after surgery protocols, and other topics that can contribute to improvements in the current standard of care.

Manuscripts submitted should not have been published previously, nor should they be under consideration for publication in another journal. The key types of articles that will be considered are original research manuscripts, reviews, and case reports addressing the theme of benign and malignant gynecologic pathologies.

Guest Editors

Dr. Cristina Secosan

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania
