

Special Issue

Coronary Artery Disease from Acute Manifestation to Long Term Consequences

Message from the Guest Editor

In this Special Issue of *Medicina*, we aim to reveal the latest developments in the diagnosis and management of CAD, from its acute forms of manifestation to long-term consequences, in order to provide the best care to every individual patient.

Research areas may include (but are not limited to) the added role of new biomarkers and non-invasive methods such as CT coronary angiography or MRI in the diagnosis of ACS, risk stratification, optimal revascularization strategies, intracoronary imaging-guided revascularization and physiology assessment of myocardial reperfusion after interventional revascularization, prevention and treatment of microvascular obstruction, the optimal timing of coronary revascularization for non-infarct-related arteries and approaches to multivessel disease, optimal antiplatelet strategy, inflammation as a treatment target, new treatment options, using mRNA- and siRNA-based therapies targeting lipid metabolism and inflammation, stem cells, nanotechnology, secondary prevention, and long-term management to reduce complications. We look forward to receiving your valuable contribution to this project.

Guest Editor

Dr. Elena Emilia Babeş

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
