Burn Injuries: From Intensive Care to Rehabilitation—Multidisciplinary Approaches to Optimizing Survival, Function, and Quality of Life

Message from the Guest Editors

Advances in resuscitation protocols, critical care, and surgical reconstruction have markedly improved survival after severe burn injuries. As mortality declines, there is increasing recognition of the long-term consequences of burn trauma and the need for coordinated, burn-specific rehabilitation to ensure that survivors regain independence, psychological well-being, and social participation. The Special Issue, “Burn Injuries: from Intensive Care to Rehabilitation—Multidisciplinary Approaches to Optimizing Survival, Function, and Quality of Life”, will highlight multidisciplinary approaches spanning from acute resuscitation, surgical, and intensive care to inpatient and community-based rehabilitation. A particular emphasis will be placed on comprehensive burn rehabilitation programs grounded in the International Classification of Functioning, Disability and Health (ICF) framework that integrate the physical, psychological, and social dimensions of recovery. We welcome original research, clinical trials, and reviews addressing innovations in critical care, reconstructive surgery, scar management, pain and mental health interventions, and outcome measurement in burn rehabilitation.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
