

## Special Issue

# Metabolic Disorders and Sensorineural Hearing Loss

### Message from the Guest Editors

Sensorineural hearing loss is an important public health problem whose prevalence has increased as life expectancy has become longer, resulting in a lower quality of life. Established causes of hearing loss include genetic predisposition, vascular causes, infections, ototoxic drugs and exposure to excessive noise, but the determinants of most cases of ageing-related hearing loss are not entirely certain. Metabolic syndrome (MetS) is a cluster of co-occurring conditions that increase the risk of heart disease, stroke and type 2 diabetes, along with other conditions that affect the blood vessels, including hearing loss. Moreover, the number of components of the metabolic syndrome is positively correlated with the rate of sensorineural hearing loss. Due to ageing of the world population, metabolic disorders are increasing, and with them the potential number of people affected by hearing loss. To date, few studies have examined the link between metabolic disorders and the causal relationship between diabetes mellitus, and hearing loss has still not been established in large longitudinal cohort studies.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
