Environmental, Metabolic and Drug-Induced Stress Pathology – Diagnosis, Pharmacokinetics, Pharmacodynamics, and Modern Therapeutic Approaches

Message from the Guest Editor

Numerous types of stress factors or stressors may act on humans, either environmental (thermal stress or viral infections), metabolic (high body-mass index), or drug-related (alcohol, nicotine, anesthetic drugs, or opioids), frequently associated with oxidative stress. On the other hand, the knowledge of pharmacokinetics and pharmacodynamics may use their manipulation in therapy, such as therapeutic hypothermia, pharmacokinetic–pharmacodynamic (PKPD) models of reversal of opioid-induced respiratory depression (OIRD), or novel nano-based drug delivery systems. This Special Issue aims to collect articles specifically related to the influences of different types of stressors in pathology, new tools of diagnosis, and the possibilities to exploit their pharmacokinetics and pharmacodynamics, such as therapies using microparticles and nanoparticles, along with reviews providing information on the state of the art, ongoing research, and future perspectives in this field.

Guest Editor

Prof. Dr. Cornelia Amalinei

Department of Morphofunctional Sciences I, “Grigore T. Popa”
University of Medicine and Pharmacy, Iasi, Romania

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
