Recent Advances in Endoscopic Spine Surgery

Message from the Guest Editors

Patient demands are increasing in the modern era, with patients no longer being fully satisfied with adequate spinal decompression and the removal of spinal pathology; patients now seek minimal soft-tissue damage, an early return to work and the preservation of spinal stability. The early development of uniportal endoscopic spine surgery and the subsequent recent development of biportal endoscopic spine surgery has evolved into the treatment of many degenerative spinal conditions. Such methods are gaining traction among spine surgeons, as they tick many boxes with regard to the concept of minimally invasive spine surgery. This Special Issue, entitled “Recent Advances in Endoscopic Spine Surgery”, aims to publish the latest research focused on uniportal, biportal, and other forms of endoscopic spine surgery. We invite cutting-edge papers related to spinal endoscopy, including basic science, clinical studies, systematic reviews, and meta-analyses. Valuable editorials and expert review articles will also be considered.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
