

Special Issue

Intracranial Aneurysms, Subarachnoid Hemorrhage and Delayed Cerebral Ischemia

Message from the Guest Editors

Intracranial aneurysms can be found in up to 3% of the global population and their rupture leads to the most dangerous subtype of stroke, affecting approximately 450,000 people worldwide per year. One of the most dangerous and dreaded sequelae of aneurysmal subarachnoid hemorrhage is cerebral vasospasm with delayed cerebral ischemia. In this Special Issue, we aim to collect research studies outlining advances in the diagnosis and management of intracranial aneurysms (embolization, clipping), subarachnoid hemorrhage or delayed cerebral ischemia. This will help explore challenges and identify priorities for clinicians and researchers. We welcome both clinical and pre-clinical research manuscripts, including systematic reviews, meta-analyses, RCTs, animal models, retrospective or prospective observational studies, and unique case reports.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
