New Trends in Autoimmunity and Vaccines

Message from the Guest Editor

In this symposium we will discuss how infection can induce autoimmune diseases, mainly by hyperstimulation of the immune systems of genetically prone individuals. An emphasis will be placed on molecular mimicry. COVID-19 will be a case in point, with 12 autoimmune diseases known to be induced by the virus as well as 15 diverse autoantibodies. The impact of vaccines with molecular mimicry and aluminum as an adjuvant will be discussed, the advantage of mRNA will be delineated, and we will address who should be aware of vaccines and what to do when autoimmune diseases emerge. Through this Special Issue, we aim to present research on how to prepare a better and safer vaccine. Further subjects to be treated here will include cytokine storms, their mechanisms, and how to avoid them.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
